Practice Support

Systems Integration

driving system enhancement

Our strategic objectives

Whole of Gippsland outcomes

- Demonstrable impacts of, and evidence for, the changes and investments we have made.
- Population level issues and trends are understood and forecast.

Localised outcomes

- Pinpointing of local issues, supported by local people, professionals and governments.
- Critical issues are advocated for in public and private health sectors.

Whole of Gippsland outcomes

- Patients use technology and other means to improve access to services, reduce demand burden and bottlenecks within physical / inperson services.

Localised outcomes

- Service delivery funded to address gaps in local communities.
- Access pressures are reduced, such as affordability and transport.
- Hard to reach people in Gippsland have access to appropriate services.

Whole of Gippsland outcomes

- Patients own and use their health data.
- Primary care providers connect to each other, with diagnostics providers, community health and with hospitals.

Localised outcomes

- Providers and practitioners use collaborative processes and methods to enable seamless patient care
- Integrated and continuity of care is supported by providers and practitioners through digital health tools and resources.

Whole of Gippsland outcomes

- Service improvements are standardised and routine.
- Clinicians work and act collegially and receive support and development.
- People in Gippsland possess essential knowledge about their health and health services.

Localised outcomes

- Facilities, services, infrastructure are suitable for purpose, demand and need.
- Providers are able to meet the health needs of the local population.

We will achieve our objectives through:

Values

People

Data

Advocacy
